

For Visitors to Evergreen Cemetery

The City of Marlborough is currently addressing some annual fall turf maintenance issues at Evergreen Cemetery. As a result, residents who visit Evergreen over the next several weeks may notice an earthy or compost-like smell while in the area. This is related to the breakdown of the organic elements of the pelletized fertilizer and should not be cause for alarm. For further information or any inquiries, please contact the Forestry, Parks and Cemeteries Division of the Department of Public Works at 508-624-6910.
