Subject: RE: Laviolette NGrid/Verizon Petition (service of West Main Street condos)

Karen,

Below are the standard conditions for the Chair concerning the utility pole relocation on Laviolette Street:

- 1) A street opening permit must be applied for by the proposed contractor performing the work.
- 2) A proper staging area is to be located/acquired before work commences – material and equipment is not to be parked/stockpiled within the city right of way.
- 3) The contractor is to ensure residents are always able to enter and exit their driveways.
- 4) Ensure construction safety controls are established (signage, drums, police details, etc...) and are in accordance with the latest MUTCD standards.
- 5) Trenches are to be paved or completely backfilled and compacted at the end of each work day. Trenches are never to be left unattended.
- 6) Post construction loaming and seeding are to be done in accordance with the 1995 MHD Standard Specifications sections 751 & 765.
- 7) National Grid to work closely with other private utility companies to expedite the transfer of overhead wires from old to new poles.
- 8) If existing pole 6 is no longer necessary, this pole is to be removed immediately after overhead wires are transferred.

Any questions, please contact me.

Mark J. Dascoli

Subject: Laviolette NGrid/Verizon Petition (service of West Main Street condos)

Mark,

Would you have time to forward conditions for the petition at Laviolette Street for Tuesday's Public Services meeting, in case Chairman Landers decides to include this item on the agenda. Please advise.
