

Mount Ward

This 74.6-acre site has some of the greatest elevation changes of any of the conservation lands in the city. The one-mile trail loops along a utility easement all the way to the top of Mt. Ward and back down again, covering a change in elevation of 110 vertical feet over 1000 horizontal feet. At the summit, take time to examine the large Maple tree that dominates the area. A second trail access from Route 20 behind the Alltown Fresh/Mobil takes walkers by the Evergreen Cemetery through beautiful woodland for approximately a half mile and connects to the Mount Ward trail loop.
